Experience

QS Digital – Frontend Developer & Project Manager (February 2024 – Present)

- Executed a code evaluation strategy using Husky and ESLint, addressing 120+ identified issues before deployment, which enhanced application performance and reduced the rollback rate by 25% during the testing phase.
- Orchestrated bi-weekly code reviews and pair programming sessions, standardizing clean code practices across the team and decreasing code defects by 15% within three months of implementation.
- Developing and managing monorepo projects using Angular, TypeScript, Next.js, Bootstrap and MUI.
- Leading project planning and sprint management, ensuring timely delivery of key features.
- Implementing scalable UI components and state management for enhanced application performance.

KraKen Tech Studios - Frontend Developer - June 2023 - September 2023

- Integrated secure payment gateway using PSE and Epayco APIs, enabling seamless processing of 500+ daily fiat and cryptocurrency transactions with 99.99% uptime in Colombian market.
- Engineered 15+ reusable UI components with Next.js and TypeScript, decreasing front-end development time by 40% and ensuring a consistent user experience across all devices.

Cobuild Lab - Full Stack Developer - March 2022 - March 2023

- Modernised and maintained React and React Native applications, improving system efficiency.
- Collaborated with backend teams to optimize API performance and security.
- Analyzed database model for new integrations.

Orinoco Dev - Full Stack Developer March 2019 - February 2022.

- Engineered fiat currency exchange flows using Node.js, Vue, and Quasar, enhancing transaction speed.
- Implemented automated end-to-end testing with Cypress and JMeter, reducing bugs by 30%.
- Managed and optimized Linux-based cloud deployments for improved reliability.
